

# Push<sup>®</sup> med Ankle Brace Aequi Flex

Strong, patented support for ankle instability

- Stabilizes with non-elastic diagonal strap
- Provides comfortable support and adapts to your ankle: the flexible foam shell compresses while conforming to individual anatomy
- Adds compression with two wide adjustable elastic straps and controls swelling / edema with a large flap
- Does not inhibit normal walking/running gait
- Worn over sock with lace-up shoe
- Creates soft, comfortable feel and wicks moisture through the Sympress<sup>™</sup> microfibers

## Indications

- Acute lateral ankle ligament injuries
- Post-surgical or non-surgical ankle fracture treatment
- Prevention of recurrent ligament injuries
- Chronic instability

## Measuring / Sizing

Measure around the ankle as shown.

Sizing: Right or Left Ankle

SIZE	INCHES	CENTIMETERS
1	10 1/2 - 12 1/4	27 - 31
2	12 1/4 - 13 1/8	31 - 34
3	13 1/8 - 15 3/4	34 - 40

## Easy application!

Apply brace over sock with rigid part of brace on the inside. Be sure foot is flat on floor and straight, with ankle bent to 90°. Fasten diagonal strap

Bring elastic strap on outside of foot diagonally across the ankle (2) and wrap around back of ankle just above heel to fasten to itself (3)

Bring elastic strap on inside of foot across the top of foot (4), over the first strap, and around ankle just above heel; fasten (5)
